

Designed to be aesthetically pleasing and acoustically engineered for quality sound reproduction, the MC range of loudspeakers are ideal for general public address, background music and voice evacuation systems.

"FT" versions are supplied with firedomes which are fitted into a ceiling prior to the driver assembly, giving the advantage of hard wiring through 2 x 20mm gland entries to a terminal block in the firedome. For ease of installation, the units incorporate a user-friendly true first and second fit fixing method and are supplied with a dual 100V/70V line transformer. A convenient plug-in connector is provided for rapid second stage installation.

The MC-6FT is supplied compliant to BS5839, part 8.
